

标线辅助类机械综述 A Brief Introduction to Auxiliary Road Marking Machinery

The construction's quality, cost and progress are often affected as the road surface treatment, pre-marking before construction and the equipment's loading, unloading and transportation before and after the construction, and other related problems can not be solved well. In view of the above situation, with the practical needs of related links of the marking construction, our scientific research personnel researched and manufactured pre-markers for pre-marking before the construction, steel brush removers for removing road mud, grease dirt before construction, wind-force road cleaner for blowing off road dust, leaves and other sundries, and auxiliary road marking products including loaders, unloaders and truck-trailers for equipment loading, unloading and transportation before and after the construction.

道路标线施工前的路面处理、放线及施工前后设备的装卸、运输等环节经常会因相关问题解决不好而影响施工质量、施工成本和施工进度。针对上述情况，我公司科研人员针对标线施工上述相关环节的实际需要研制了用于施工前放线的预标线机，用于施工前清除路面泥巴、油污等顽污的钢刷清除机，用于吹走路面浮尘、树叶等杂物的风力净路机，以及用于施工前后设备装卸及运输的装卸车器及拖车等辅助类标线机械产品。
